

Mary,

It's going to be hard to say good-bye to such a wonderful teacher and even more to a friend. I hope you will come up to the science fair next year so I can see my favorite teacher again. Maybe will have some ice cream and pickles. I have certainly enjoyed being in your classes for the past 4 years. I know it has been hard on you because I was in your class. I made it pretty difficult for you sometimes. I'm sorry if I said or did anything to hurt you. Please don't throw me out of class again. Thanks for putting up with me <sup>more</sup> so much. I felt free to do things in your class than others. I guess because you aren't a stick-up the leg like some other teachers I've had. You can take jokes better than most.

Thanks for letting me be a lab assistant also. Of all classes that was the periods I enjoyed the most. It was a place to do stupid things to let off some of the tension accumulated during the day. I'll never forget our baseball games, nor monopoly, checkers class and of course shuffleboard. I don't think you'll forget either. I doubt if either of us will forget water fights and STOPPER FIGHTS. Don't forget my-pide either. I guess I had better close before I get all ~~choked~~ up. I'm going to miss you next year.

Your favorite student??  
Bobby

P.S. I really had you wrap around my finger didn't I? Ha. Ha.  
It's been a blast.

Dear Mrs. Van Dyke,

It is very hard to say good by to such a good teacher and even more a good friend. I'm only now beginning to appreciate the things that you've tried to teach me (it was my fault, not yours, that I didn't learn any more than I did) and I know that I will come to appreciate it more and more. I'm glad that I was in four of your classes these past three years. You're really a great, great teacher and I'm sorry for our sakes that once again we are loosing you to the ranks of motherhood, but I'm sure our loss is your gain (Ha!) I'll never forget the science club meetings, 2<sup>nd</sup> period Physics, and 5<sup>th</sup> period lab and Chem II. I don't know what I would have done without having gone to the Science Fair at Cyp. and the Fairs at Duke & UNC. Remember the Fan Belt, the car that wouldn't start, and the real rot at the Schell.

I don't really know how I'm going to survive next year without having you for a class but I'll guess I'll manage. Once again thank you very much for all the trouble and concern you have shown for me and all the help and prodding you've supplied. I really do appreciate it and I want to apologize for all the disruptions I have caused. Once again

THANKS!!!

Brent

P.S. Don't be surprised if I come back in a couple of years for some more help with Physics and Chemistry.

MARION HIGH SCHOOL

*A high school  
emerged*

*When it began*

it was small and insecure  
but on the threshold  
of a great adventure.

*Some years were lean,*

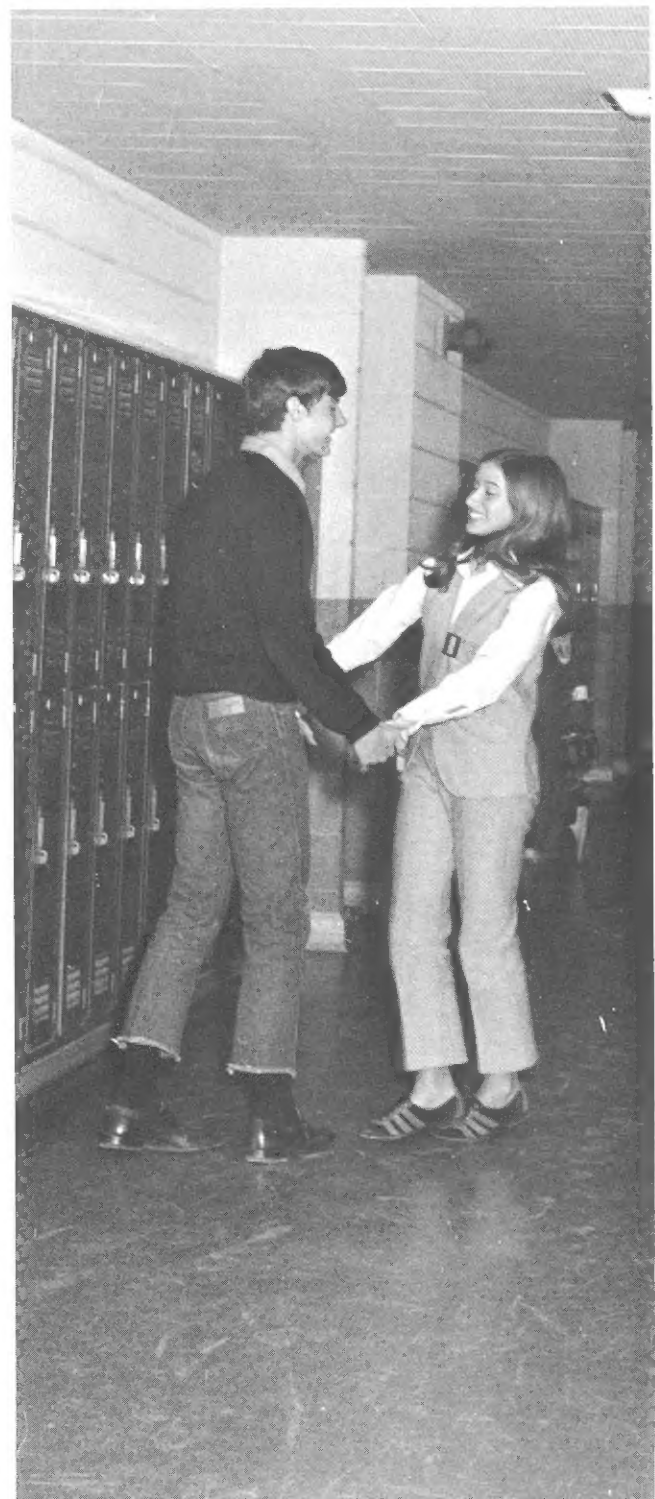

some were good, but

even the lean years

were good,

because the high school

was striding forward.

In its sometimes not too  
adolescents became adults.  
Life became fact and reality.  
I shed a tear for those who stumble  
and glorified in those who  
learned to cope.

tender embrace,

*With an ever-increasing curiosity,*

it grew—

watching students come and go

and helping them to become more aware.

*Becoming of Age,*

the high school emerged.

It was proud,

yet humble.

So much had been done,

but the tasks undone

and the challenges untried

loomed on the horizon

and clearly portended

a beginning.

In spite of a few minor obstacles, the Marionette staff kept the student body informed on sports, club news, and happenings around the school. In order to allow more cooperation by students, the staff borrowed themes from various English classes.

Through the yearbook, the Hylander staff members attempted to tell the story of Marion High School's last year. With new innovations they strived to carry on some of the traditions of former annuals. Staff members also sold advertisements which aided in the finance of the Hylander. Editors of this year's book are Robbie Burgin and Bobbie Roberts.

MARION

Mrs. Van Dyke,

First of all I want to thank you for putting up with me this year in Physics. I think that if you knew all that had happened while you were out of the room it would have been a different story. I did enjoy the class this year and I know I will be thankful that I took it when I get in college. It looks like this is going to be **M. H. S. BAND** the last year for both of us which in ways is both good and bad because I know both of us will miss high school in some ways. I wish you and your family good luck in the future

Good luck with love,

Mrs. van Dyke,

I really don't know what to say. Good-bye sounds cold and finale but I guess that's what life is. I want to thank-you for three wonderful years. I know we all grumbled about your tests, homework, or whatever but we wouldn't have had it any other way. I for one am very grateful for having you. I think that I'll know a little bit of Physics and Chemistry next year. Really though it goes deeper than that. you were my friend as well as my teacher and that means a great deal. I always felt that if I was ever troubled about something I could come to you. you may not know it but some of those little talks during Lab really helped me. I don't know how to thank you for all of the help.

## AIR PREHEATER COMPANY

It has really been nice having you for three classes this year. I guess I made you angry a few times and I'm sorry. I'll never forget Physics and Lab. Lab is a unique experience. It's amazing how close you can become to your classmates. How the Lab has survived all of the water fights, stopper fights, soap fights, broken windows, and other little games I'll never know. I'm very thankful that I had the privilege to be a Lab Assistant. I'm glad that you have a good sense of humor otherwise I know about 4 people who would have been expelled long ago.

GARDEN CITY

I'm really going to miss you next year. I know that I will always cherish the memories of my Science classes. Thanks again for all of the friendship and help.

Love to a very wonderful person,  
Brenda Smathers

It's been fun this year and I certainly appreciate your answering all of my questions. It was also great of you to take us to the Science Fair and help with the Jr. Sr. Don't forget the time we had so much trouble with your car! I have to think up a Mrs. Neal and some of us will have to think up a prize-winning (state even!) science project.

Mrs. Van Dyke

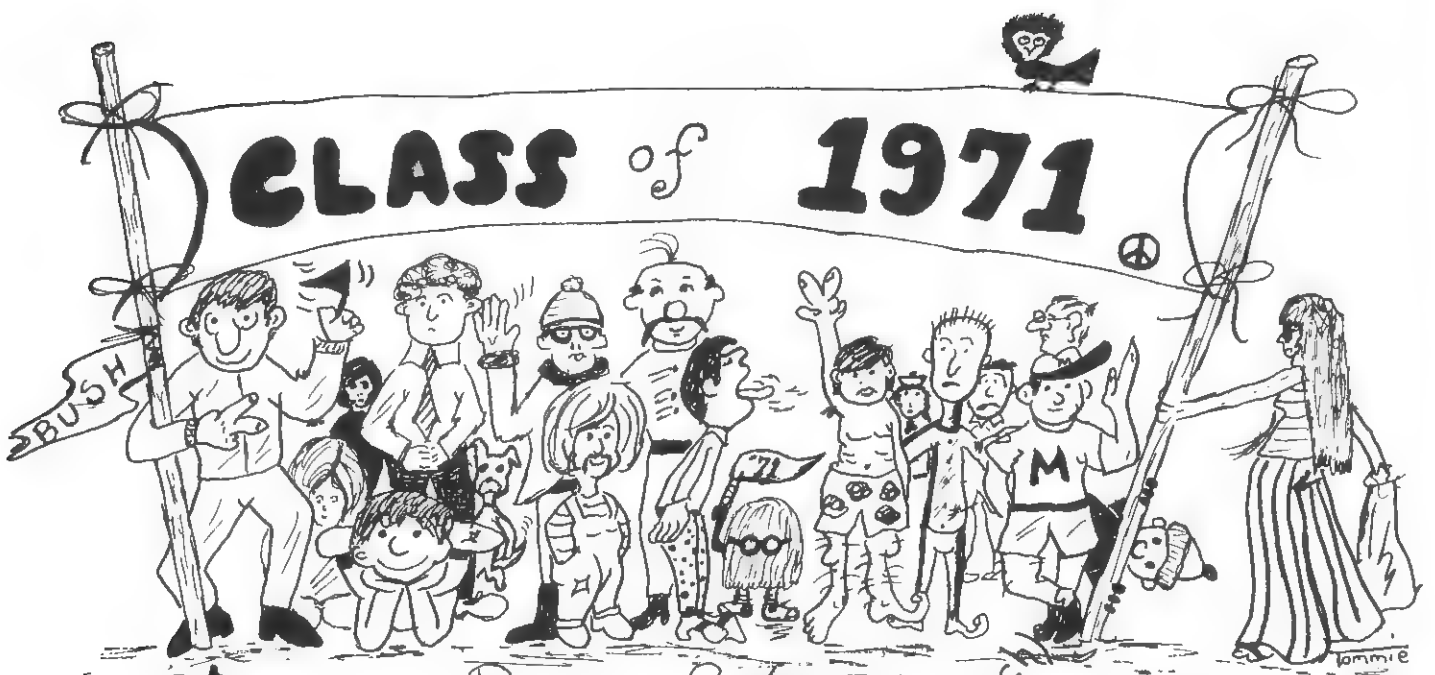

As Brenda said before good-bye is sad but that's what it's come to. Many thanks are owed to you before we do though. All of us love you for putting up with our antics in lab and we appreciated the long talks. I thought also thank you for listening to all my worries about school - I'll make it to Duke yet! As much as I grumbled I'm thankful for Chemistry 'cause I won't be here next year. Thanks for the science fair trip and just in general thanks for being a teacher I could and talk **1971 HYLANDER STAFF** turn to to with- out feeling like I was being put down.

Hope you love your girl - don't forget Chris will be old enough for chair next year - will get you to council yet,

much luck and love to a super friend  
as well as teacher,

## From the Editors

A high school emerged and was now getting ready to face another change. Through the past 167 pages, an emphasis was placed on the student; for he was the high school. He made it what it was and what it would be.

As we, the editors, sit in this little room which came to be so much of our life; it is hard to remember back to that first day in September, when we drew up our first page. At that time there were plenty of pencils, layout forms, and copy sheets. Now the pencils are worn down and it is next to impossible to find a copy page. Now that the book is finished and the room is quiet; we can see that the Hylander was more than just pictures and copy. It was people. From that first meeting to that last week we worked so hard. Many times it must have seemed to the staff, like there were witches running the book instead of editors. All the staff ever heard was "Do it over, you know when the deadline is."

Special thanks were due a great staff, those who stopped in at the last and those who stayed till the end. Whether they were faced with working in limited space, finding out who hundreds of people were or sorting the many students portraits; the staff showed dedication to a common goal.

Large medals of honor go to Mr. Robert Howell for his support and endless calls to Chesnee, S. C. To Mr. Max Gee, school photographer, and Marjorie Noyes, Pam Pugh, and Margaret Hawes for their unbelievable hours of work. And also to Lydia Hagna, Beverly Glenn, Marie Morris, Lynn Goodson, Jan Bolick, and Terry Potent for their work on organizations and copy. And three very special awards to Doug Johnson and Tommy Wilson for their work with the art, and to David Miller who got away with so much Mr. Howell will never know about. And not least of all to MHS for being just like it was, the best school in the world.

Now that the end was in sight, the long hours, late evenings, and all week-end sessions seemed worthwhile. Those who have seen the Hylander room and wondered what went on would never know what they missed - a great experience.

Dear Mrs Van Dyke,  
It really has been  
fun having you as a teacher.  
I really have learned a lot from  
you. We sure will miss you next  
year. I don't see how you're put up with  
us this year.  
Love,

Dear Mrs. Van Dye,  
It has been wonderful  
having you as a teacher this  
year. You are the best  
teacher I have ever had.  
Remember our 4th period

Dear Mrs. Van Dyke,  
I have enjoyed  
your class. You  
are a wonderful  
teacher. I think  
I should have  
paid you for  
the attention  
you gave me.  
I know I  
will miss you  
when you go  
home. Love,

Dear Mrs. Van Dyke,  
Hope you have a  
happy life. Have as  
many babies as you  
can possibly have.  
You a good teacher  
and a good friend

Dear Mrs.  
Van Dyke,  
We're so  
happy that you're not going  
to give us a final!! That's  
really whompish of you. We've certainly  
enjoyed making your days happy. Remember  
us for our smiling faces and "wet" humor.

Just think, very soon you're going to  
 have another little ~~dyke~~ ~~running~~ around.  
 To be perfectly honest with you, we don't  
 know anymore about physics ~~that~~ now that we did  
 know when we ~~we~~ first came in here but that's not  
 your fault. I hope you can forgive my moment of insanity. I'm under  
 treatment now and I know what ~~it~~ begins soon. Maybe if I took chemistry  
 would have known what ~~it~~ likes to expect from me, but then  
 em the type that ~~it~~ surprises!
